*A New Scent to Celebrate
Elegance & Grace*

Graceful Perfume Oil, page 3 - This delicate fragrance is the essence of beauty, designed to make yourself and those closest to you happy. Its freshness is clean and pure, creating a very personal statement—in line with our most popular signature scents including Rain, China Musk and White Tea. Classic notes are artfully blended to create a modern accord with top and heart notes of bergamot, grapefruit, orange blossom, American Beauty rose, freesia and jasmine all enveloped by a veil of white musk. As the French say, this exquisite blend is “passe -partout”—ready for any occasion!

*Luscious New Massage Bar To Melt
Away Tensions & Hydrate Skin!*

Luscious Shea Mint Massage Bar w/Adzuki Beans, page 6 - This unique, heavenly cocoa-mint massage bar relieves tense muscles, while gently stimulating skin and spirit with uplifting peppermint essential oil and raw adzuki beans—long used in Asia for their polishing and toning properties. The rugged, nobby side does the work of fingertips while rich, moisturizing Shea and Cocoa butters melt into warm skin for smooth sensations. It also makes a nice moisturizer. All natural and preservative-free. Pack in Nectarine's **Clear Cello Bag** (below) and offer as a delectable gift or for personal pampering!

*Note: This product is all natural and is designed to melt at about body temperature. Occasionally, during hot months, these products can melt during shipping. Nectarine cannot be responsible, as we ship FOB Berkeley. And we will not be able to replace or refund the melted item. If you put them in direct sunlight or in a very hot room they can melt too. As with all natural body care products, they are kept best in a cool place. Often they can firm up again when refrigerated.

RECYCLE SYMBOL DEFINITIONS & BOTTLE USAGE

This code system identifies the plastic material used in each container and packaging component. The numbers are equivalent to the plastic material it represents.

♻️ PETE Polyethylene Terephthalate—This clear plastic bottle can be used for any product and is recommended for use with bath and massage oils because of its good barrier properties that inhibit the loss of oxygen in the bottle when the oil and bottle container resin interact. This type of plastic is accepted by more recycling facilities because of its chemical composition. It is widely used in the beverage industry for bottled water and sodas.

♻️ HDPE High Density Polyethylene—This is a plastic bottle that has a natural or slightly frosted appearance. Recommended for use with lotions or shower gels, but not for bath or massage oil.

♻️ PVC Polyvinyl Chloride—This clear plastic bottle can be used for any product and is recommended for use with bath and massage oils because of its good barrier properties that inhibit the loss of oxygen in the bottle when the oil and bottle container resin interact.
